SUMMARY

Third-year Computer Science undergraduate specializing in Cybersecurity, with hands-on experience in security monitoring, incident response, OS hardening, and vulnerability assessment. Certified Ethical Hacker (CEH v13) with practical exposure to SIEM tools, log analysis, endpoint protection, and firewall review through internship and lab environments. Proficient in Burp Suite, Nmap, Wireshark, Metasploit, and Splunk/Wazuh, with a strong foundation in OWASP Top 10, threat detection, and security documentation. Passionate about defensive security operations and eager to contribute to enterprise-level SOC and security monitoring workflows.

INTERNSHIP EXPERIENCE

Cryptus Cyber Security Pvt. Ltd.

Delhi, India

Cyber Security Intern

Feb 2026 - Present

- Supported vulnerability assessments and security audits on web applications, identifying SQL Injection, XSS, and authentication vulnerabilities using Burp Suite and Metasploit, triaging 20+ critical and high-risk findings by severity to prioritize remediation.
- Assisted in identifying and documenting security incidents, maintaining detailed incident records and security process documentation to ensure audit-ready reporting standards.
- Performed OS hardening on Linux and Windows systems, configuring security controls, disabling unnecessary services, and enforcing least privilege to reduce endpoint attack surface.
- Reviewed endpoint security alerts and API security behavior, analyzing system activity to flag anomalous patterns and support proactive threat detection and incident response.
- Prepared detailed vulnerability reports and remediation recommendations, enabling development teams to resolve 90% of identified security issues through structured documentation.

PROJECTS

PhishGuard: ML-Based Phishing Email & URL Detection Tool

Tech Used: Python, Scikit-Learn, TF-IDF, Pandas, NumPy, React.js, Node.js

Sep 2025 - Nov 2025

- Built ML-based phishing detection system supporting threat detection and security awareness, classifying malicious emails with 98.9% accuracy and URLs with 93.4% accuracy to reduce phishing risk.
- Demonstrated phishing attack patterns and prevention techniques to internal teams, contributing to security awareness training initiatives.

WebSecScan: Web Application & Server Security Assessment Tool

Tech Used: Python, Flask, Nmap, Nikto, OWASP Top 10

Feb 2025 - Apr 2025

- Developed automated vulnerability scanning tool, reducing manual security audit effort by 60%, mapping findings to OWASP Top 10 and CVEs for structured risk assessment and prioritized remediation.
- Generated detailed security assessment reports with remediation guidance, improving vulnerability tracking and security documentation efficiency by 40%.

USB Forensics & Endpoint Security Tool

Tech Used: Python, Tkinter, USBGuard, Pynput, Gnome Screensaver, Linux

Oct 2024 - Dec 2024

- Developed endpoint monitoring tool integrating USBGuard to detect and block unauthorized devices, reducing risk of malware introduction and data exfiltration across endpoints.
- Implemented real-time USB event logging to support incident investigation, audit trails, and unauthorized device detection workflows.

EDUCATION

Bennett University

Greater Noida

Bachelor of Technology in Computer Science Engineering (Specialization in Cyber Security)

Aug 2023 - May 2027

Relevant Coursework: Penetration Testing, Auditing & Ethical Hacking, System & Network Security, Linux & Shell Programming

CERTIFICATIONS

Certified Ethical Hacker (CEH v13) by EC-Council

Feb 2026

Cybersecurity Essentials by Cisco Networking Academy

Aug 2025

Introduction to Cybersecurity Tools & Cyberattacks by IBM

Jan 2025

SKILLS & INTERESTS

Security Operations & Monitoring: Security Monitoring & Alert Triage, Log Analysis, SIEM (Splunk, Wazuh), Incident Identification & Response, Endpoint Protection, Firewall & Antivirus Alert Review, Patch Management, OS Hardening, Threat Detection, Vulnerability Assessment & Security Auditing, Risk Assessment, Network Security, OWASP Top 10, Web Application Security, API Security Testing, Security Testing Methodologies

Programming & Automation: Python (Scripting & Automation), SQL, Shell Scripting (Bash), JavaScript

Tools & Platforms: Splunk, Wazuh, Wireshark, Burp Suite, Nmap, Nessus, OpenVAS, OWASP ZAP, Nikto, Metasploit, SQLmap, Windows Defender, Kali Linux, Windows, Postman, Git, GitHub, Jira

Soft Skills: Security Documentation & Incident Reporting, Security Awareness Communication, Technical Writing, Attention to Detail, Problem Solving, Team Collaboration, Time Management
